

Accounts, tenancy & unit transfers

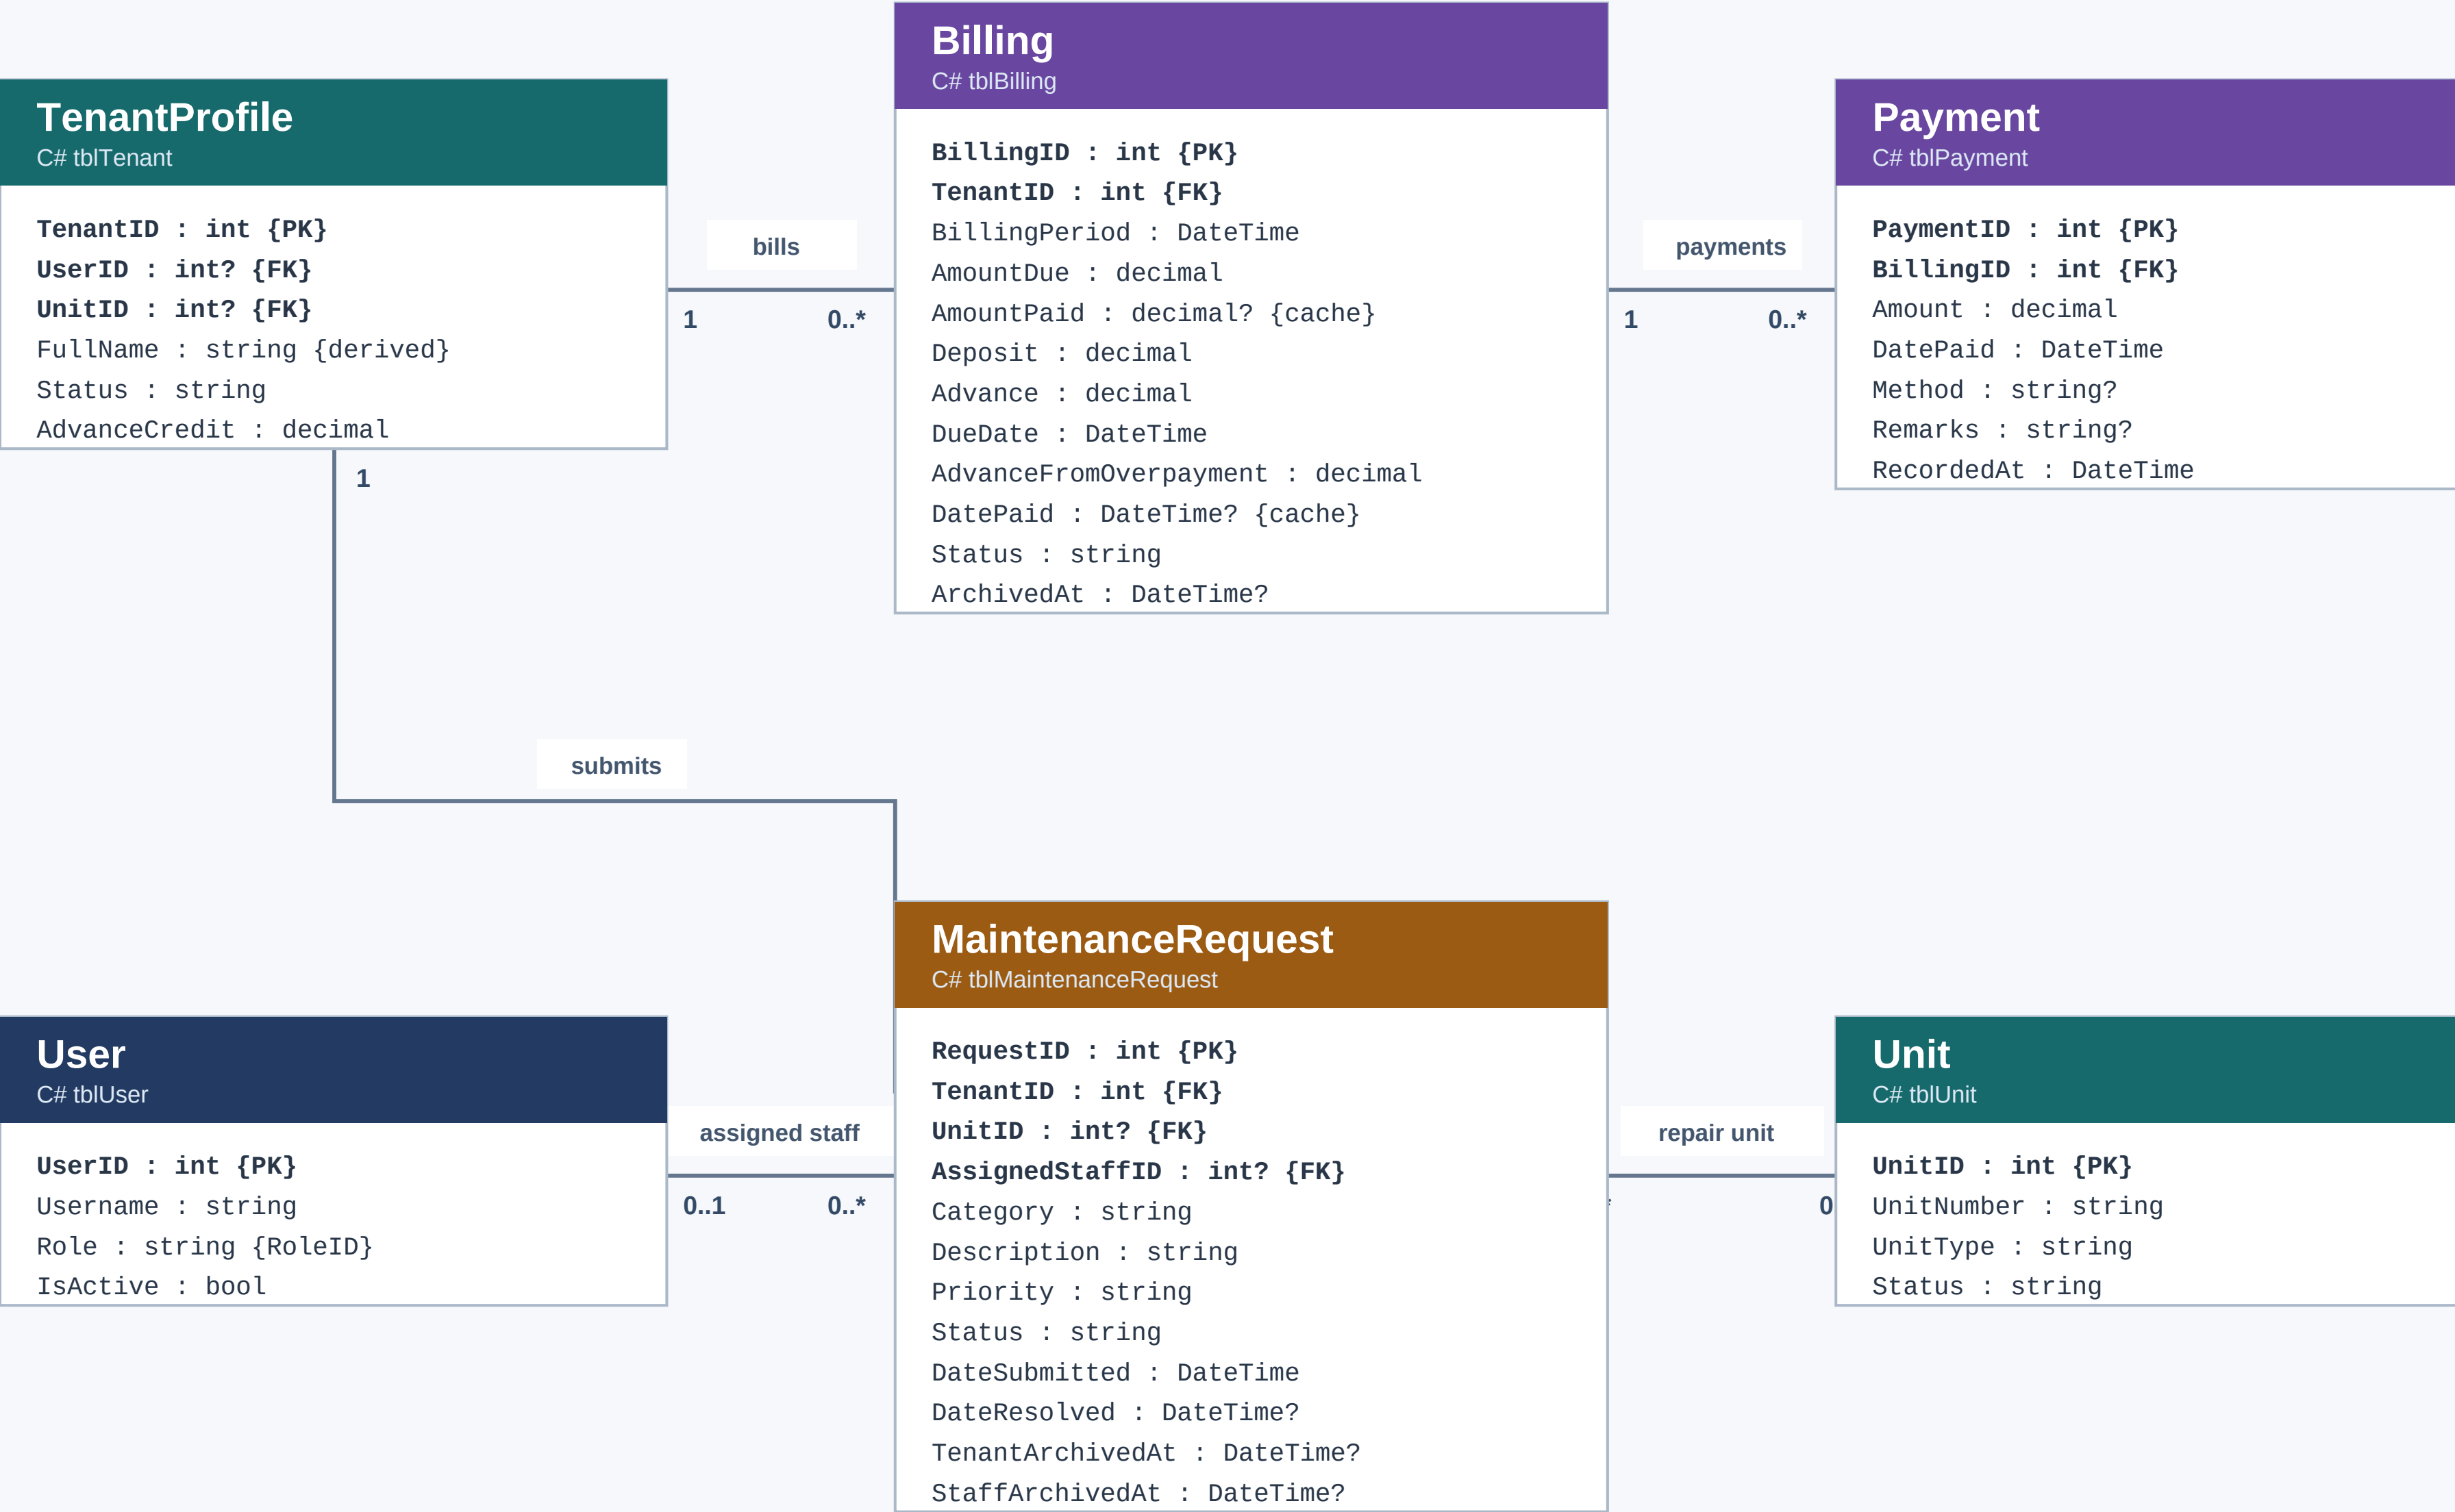

Identity, current occupancy, assignment history and transfer requests

User.Password maps to SQL PasswordHash. TenantProfile.UnitID is current; assignments retain history. Transfer.CurrentUnitID is a snapshot.

Billing, payments & maintenance

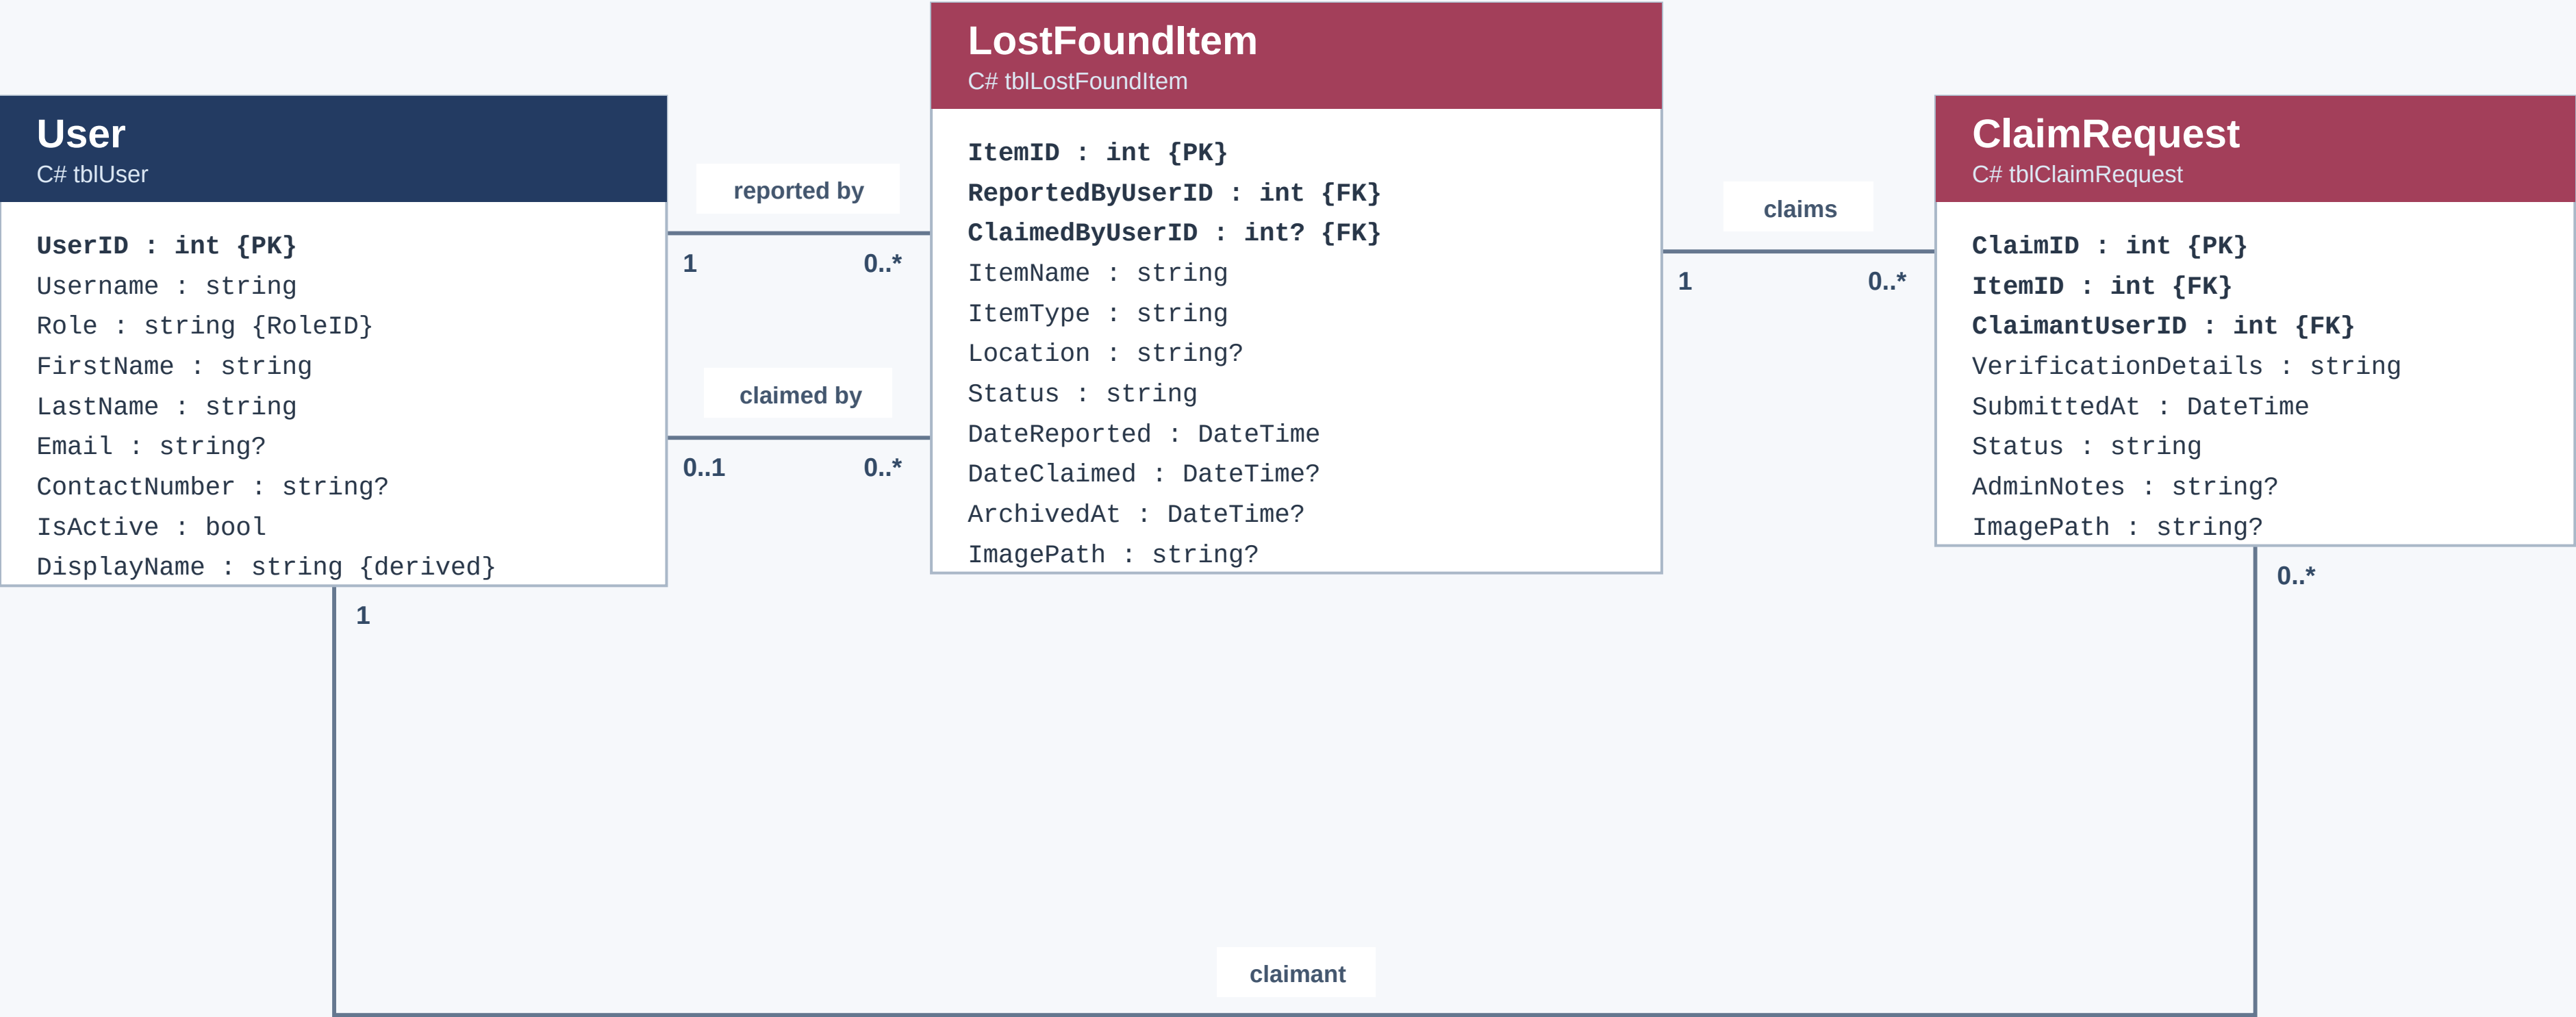

Money received is recorded per payment; maintenance stays linked to its original unit

Payments is the ledger. Billing.AmountPaid and Billing.DatePaid are synchronized summaries. AssignedStaffID maps to AssignedStaffUserID in SQL.

Lost & Found and ownership claims

Admins and tenants report items; tenant ownership claims are reviewed by an admin

ClaimedByUserID is optional until handover. An approved claim closes an item; admins can also record a direct handover without an online claim.
